Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Prior art of record does not teach or suggest the claimed limitation "performing a plasma treatment directly on the patterned and etched layer of gate material and directly on exposed surfaces of the provided substrate, wherein a gas based layer is formed over the patterned and etched layer of gate material and the exposed surfaces of the provided substrate after performing the plasma treatment".

Reference to Gardner et al. (US 6,323,519) involves the formation of oxide layer 22 before a plasma treatment. It would have been unobvious to exclude the oxide layer 22 from the plasma treatment because doing so would destroy the intended purpose of the reference. As for Saul et al. reference (US 5,425,843), there is no evidence indicating that the plasma treatment with H₂ and N₂ would result in a gas based layer formed after the plasma treatment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trung Dang whose telephone number is 571-272-1857. The examiner can normally be reached on Mon-Friday 9:30am-6:00pm.
